

MOAB IRRIGATION COMPANY

2014 OFFICERS REPORT

Annual Meeting – February 2, 2015

The budget this past year was \$53150.00

Actual Expenses was \$45798.17

We ended the year \$7000.00 under budget as I left some repairs undone, not having some one to make main line repairs. We do not have a contractor readily available to do work.

There was a little bit of a water shortage this past summer we pumped 46 AF from the wells.

The Mill Creek Distribution Committee decided not to have a River Commissioner for 2014 that left the job of water measuring up to the owners. I, for most of the year, recorded meters Tuesday and called them in.

Maintenance: I replaced three in valves, and three right angle gear boxes. Also 30ft of main line was replaced on 5th West to fix two leaks.

The main line on Ditch #1 was moved and replaced at North Main Comfort Inn. This was done by the building construction crew. The line is still in the original easement, but now located on the outside of the wall around the parking lot.

Dave got us a refund from Days Inn. The main line was broken by their maintenance workmen in 2013.

The easement through the hospital property was finally recorded this past year.

Work or Maintenance List: Rotary Park 8in valve, right angle box broken. Air vent stack broken. Right angle gear box broken at Wanda Secrest valve. Ditch 3 has a root plug. Ditch one has a drainage issue.

Water Diverted: Year 2014

Ditch #1 431AF

Ditch #2 353AF

Ditch #3 414AF

South Mesa, North Mesa, and Horse Creek Totals 927AF

Kens Lake: 3154AF

McKennis & Farnsworth 164AF

President George Carter
